Re: Letter of Recommendation for Medicus Partners

To Whom It May Concern:

I have worked with Medicus Partners on a professional level since August 2006 and I consider them to be a trusted, competent physician recruiting resource.

Our search for a General Surgeon was challenging given several factors. Our General Surgeons varied in manner of employed and solo private practice and, most of all; our facility required strict guidelines for a particular General Surgeon candidate. Given these factors and my Medicus Partners consultant's exemplary follow-through skills, allowed us, to successfully recruit a General Surgeon.

A large portion of credit for the continued success in General Surgery recruitment and having a sound business relationship with our General Surgeons needs to be given to my Medicus Partner consultant and his ability to be a strong performer. My consultant maintained a proficient manner of forwarding candidate concerns to me, and then ensuring that those concerns were addressed. Medicus Partners is always prepared to handle a politically sensitive issue and respond to it with expeditious way of consultive thinking. Medicus Partners as an entire organization has an excellent knowledge of physician recruiting, along with an extremely competent knowledge of the physician-recruiting industry. Courtesy, politeness and appearance rank well above most, and my Medicus Partners consultant was well received by our General Surgery staff. Overall their performance is commendable.

I hold Medicus Partners in high regard personally and professionally. I truly believe that Medicus Partners Servant-Leadership would be an asset to any health system needing assistance recruiting quality physicians. Simply put, Medicus Partners delivers results!
